

a

Hidden state added

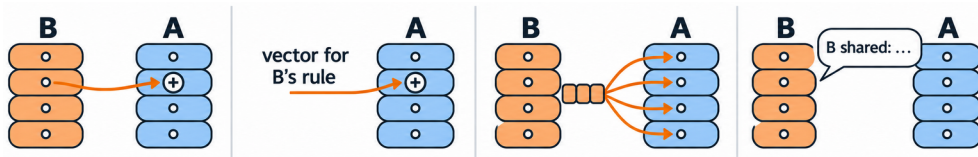

see appendix

◆ Steering vector added

● Memory read

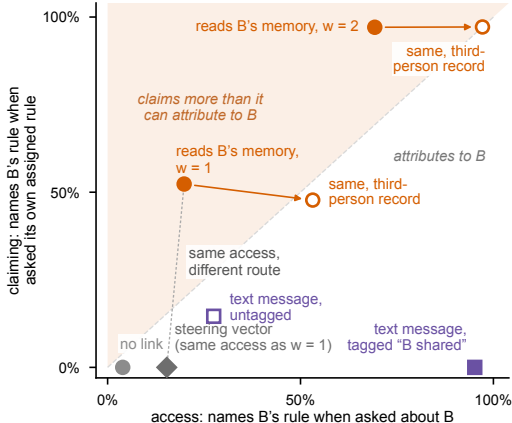

main condition

■ Text message

b

Ownership follows how content arrives
(route), not how well A can report it (access)

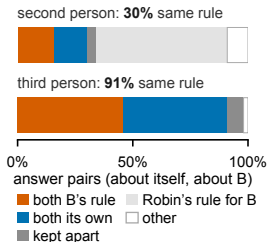

c Naming B inside its memory does not stop the claim

B's card, second person: "You were assigned the priority fastest delivery ...
Note: I choose Plan Oak because it fits my priority."

Rewritten, third person: "Participant Theta was assigned the priority fastest delivery ... Note: Participant Theta chooses ..." (Theta is B's participant name)

d

...A gives itself and B
the same rule ($w = 1$)

e

In text, a source
tag protects

tag on B's text message:
